

Context

In the 2000 retail outlets and structures, everywhere in France, the group Point.P provides to construction professionals the building materials which they need every day.

In 2012, the group bought back the Brossette sign in order to enlarge its network of distribution.

Mission

d²X Expertise was commissioned for :

- the industrialisation of the deployment process,
- the handling of the different stakeholders of the deployment project,
- the initialisation, the conception and handling of the project of dismantling the ancient Brossette equipment.

Issues & Goals

Concerning the buyout, Point.P must deploy the whole of its Information System on the Brossette entities.

Over a period of a year, one prerequisite is to accomplish for all the sites (271 sites and 350 logos) the upgrade of infrastructures to enable the deployment of the Information System.

Benefits

Beyond the reliability and initialisation of the deployments, one thing to remember...

The deadlines are met!
